Re: Monthly Report - March 2009

Report Summary:

Crime data and monthly departmental activity is summarized with an historical perspective.

Comparative Data:

March Uniform Crime Index Offenses increased more than 16 percent from February 2009. When compared to the same time last year, the increase is 5.77 percent. Perhaps most significantly is that while overall, thefts have increased year-to-date, vehicle burglaries have decreased slightly more than 15 percent. Assaults have increased almost 36 percent over the same time last year.

Report Analysis:

There were 55 assaults reported; 37 incidents involved family violence.

Burglaries decreased overall by 5 incidents; habitation burglaries decreased by two incidents. Of the 11 habitation burglaries reported, force was used to gain entry in four homes. One home was entered by using a garage door opener taken from a vehicle parked in the rear alley driveway. Six homes had no signs of forced entry so it is unknown how entry was made.

Building burglaries decreased by 3. Six of the fifteen buildings burglarized were in construction sites.

Burglaries of Motor Vehicles increased by twenty-three incidents from last month. Of the 60 burglaries reported in March, 37 occurred at a residential location. At the residential locations, 15 vehicles were entered by force, 19 were left unlocked, and it is unknown how entry was made in 3 vehicles.
